SUMMARY

I am a passionate programming enthusiast with a strong background in web development. I enjoy building programs from scratch and tackling complex coding challenges. With a diverse skill set in technologies such as React Js, JavaScript, Next Js, TypeScript, MySQL, Firebase, NodeJS, and HTML/CSS, I am detail-oriented and focused on achieving optimal results, never settling for just an average outcome. My drive for continuous growth pushes me to always strive for the best solutions in every project.

EDUCATION

2023 Complete Front-End Engineer Career With ReactJS   Aug - Des 2023

Alterra Academy - MSIB Batch 5

Frontend Division Team Leader

Informatics Engineering   2021 - Present

P R O J E C T

SISTA ↗   Present

Final project information system and online thesis guidance

On this platform, students can submit thesis titles for approval, and admins can approve the submissions by assigning thesis advisors. Once assigned, students and advisors can conduct online mentoring sessions. Afterward, students can register for their thesis defense and receive their final grades.

IndoQur`an ↗   May 2023

Quran and Tafsir Website with Murotal Audio

Users can search for verses by name, meaning, or letter count. They can also search for specific verse numbers to read. The app allows users to choose from 5 international reciters and play their recitations. Additionally, users can like, bookmark, share the verse via WhatsApp, or copy the verse link.

studywithme ↗   Jul 2024

A learning platform for simple programmers based on videos and online quizzes

Users and admins can log in to the platform. Admins are responsible for managing content and questions. Each series includes a discussion section, and online quizzes are available with automatic grading.

RealChat ↗   Oct 2023

OpenAI-based Message Chat Website Application

Users can send text messages, images, and generate responses using OpenAI. They can reply to, delete, or edit messages. Users can also view the read status of messages. Additionally, users can start a chat by searching for an email address or the recipient's name.

Pilihanku ↗   Sep 2023

Website Application for Online Chair Election

Users can create an account and log in using their Google account. They can create and delete election

forums, set rules, and register candidates. Users can share the forum link and view live, real-time election

results in a graphical format.

Desa Jayasampurna ↗   Sep 2023

Village Introductory Website and Digital Library

Users can view the village profile, including its vision and mission. They can explore the gallery and read a

variety of fiction and non-fiction books. Additionally, users can view the village location on Google Maps.

Tiket Bus ↗   Jul 2023

Bus Ticket Purchase Website Application (Buyer and admin)

Buyers can create an account and log in to access the main page. They can choose the schedule, select the

departure destination, pick a seat, and make a booking. Admins can scan the QR code on the buyer's e-ticket

for verification. Additionally, admins have the ability to create, delete, and modify fleets, buses, cities,

terminals, and departure schedules.
